Wes's Words of Wisdom

How many times in a round do you look at a divot after you have hit your ball? I'm sure this will be a bit controversial but I'm here to tell you divots DO NOT tell your club path, starting direction, lie angle or angle of attack. The only thing you should be worried about concerning a divot is that it starts a couple of inches in front of the golf ball.

With Spring finally arriving and temperatures increasing, rainfall (or lack there of) will now become the focal point in the month of May.

Please keep the following in mind this Spring:

- Sand Traps-Please rake them and place the rake itself along the bunker's edge (as shown in the picture to the left).
- Golf Cart Traffic-Please keep the carts a safe and reasonable distance from each green. This will ensure quality playing conditions around our green complexes.

Each month we will highlight a different piece of equipment we use to take care of the golf course. This month is our Sand Pro. It is also shown in the picture to the left. This equipment rakes the sand traps and also aids in spreading the sand after a heavy rainfall.

I hope to see everyone out on the course soon!
